

Summer Work - Trabajo de verano

**Incoming 6th Graders - Estudiantes entrantes a 6to grado
(class of 2029) - (clase del 2029)**

Welcome Letter (English) – page 2

Carte de bienvenida (Español) – page 3

Summer Reading & Writing – pages 4-10

Summer Math – pages 11-27

Calendars to Plan Out Work – pages 28-30

Supply List – page 31

Library Card Information Sheet – pages 32-33

Dear Incoming Grade 6 Families,

As the 2025-2026 school year draws to a close, we are looking forward to welcoming a new group of 6th grade students. In preparation for the year ahead, we are excited to share with you the summer assignments. Completing summer work helps to keep your skills sharp and ensure you are ready for middle school.

Below you will find the summer reading and writing expectations, the summer math assignment, calendars for planning out when you will do your work, and a brief supply list.

This summer, you have one required book that we all will read, along with one required choice book. In total, you will read two books. The first required book is ***The First Rule of Punk***, a novel by Celia C. Pérez, which is included with this packet. You should read it close to the start of the school year because we will be discussing this book in class, and it will be helpful to have it fresh in your mind as you prepare to share your insights. Reading questions included in this packet are a great way for you to prepare for the discussions we will have in class together this fall. You will bring your copy of ***The First Rule of Punk*** and the completed questions back to school with you.

If you'd like access to the audiobook for ***The First Rule of Punk***, it is available through this Audible account and can be found under the Library section of the app. The Audible app can be downloaded on both iOS or Android devices. We request that users do not make any changes or purchases on this account as it belongs to Ms. Jen Ko and is used by many students.

Email: g5readers2223@gmail.com

Password: G5Readers123!

The second required book is a choice book that will come from the choice booklist below. You can borrow this book from a library, purchase it, or borrow it from a classmate. You can read a physical or digital copy. You will then complete the assignment after reading the book. You do not need to bring the book to school with you.

The summer math work is meant to help you review your math skills over the summer. It is not intended to take an overwhelming amount of time. If you do a handful of problems per week, you should finish before the start of school.

We understand that students may need support managing long term assignments. To help with planning, we've included calendars for June, July, and August towards the end of the packet. Additionally, the supply list of items sixth graders will need is on the last page of this packet.

We know that summer is a break from school, but we encourage you to read beyond the list attached here. Reading is not only a great way to improve vocabulary, fluency, and comprehension, but it can also spark rich conversations. Families, feel free to read any of the required texts with your child. Discussing a book as you read it together can enrich your student's comprehension and be an enjoyable, shared experience.

We are busy working and planning for an amazing 6th grade year, and we cannot wait to begin the year together! We look forward to getting to know you when we return to school. Have a safe, relaxing, and well-deserved break.

Sincerely,

The Grade 6 Team - Ms. Heather, Ms. Lisa, Ms. Rachael, & Ms. Sara

P.S. If you have any questions about your summer work assignments, please email Ms. Heather at heather.smith@newschoolsf.org.

Estimadas familias de los nuevos alumnos de 6.º grado:

Con el fin del año escolar 2024-2025, nos entusiasma dar la bienvenida a un nuevo grupo de estudiantes de 6.º grado. Como preparación para el próximo año, nos complace compartir con ustedes las tareas de verano. Completar las tareas de verano les ayudará a mantener sus habilidades al día y a estar listos para la secundaria.

A continuación encontrará las expectativas de lectura y escritura de verano, la tarea de matemáticas de verano, calendarios para planificar cuándo hará su trabajo y una breve lista de útiles.

Este verano, tienes un libro obligatorio que todos leeremos, junto con un libro de elección obligatoria. En total, leerás dos libros. El primer libro obligatorio es La **primera regla del punk**, una novela de Celia C. Pérez, que se incluye en este paquete. Debes leerlo cerca del inicio del año escolar, ya que lo discutiremos en clase y te será útil tenerlo presente mientras te preparas para compartir tus ideas. Las preguntas de lectura incluidas en este paquete son una excelente manera de prepararte para las discusiones que tendremos en clase este otoño. Traerás tu copia de La **primera regla del punk** y las preguntas completadas de vuelta a la escuela con usted.

Si desea acceder al audiolibro para La **primera regla del punk**, está disponible a través de esta cuenta de Audible se puede encontrar en la sección Biblioteca de la aplicación..La aplicación Audible se puede descargar tanto en dispositivos iOS como Android. Solicitamos a los usuarios que no realicen cambios ni compras en esta cuenta, ya que pertenece a la Sra. Jen Ko y muchos estudiantes la usan.

Correo electrónico: g5readers2223@gmail.com

Contraseña: G5Readers123!

El segundo libro obligatorio es un libro de elección que se encuentra en la lista de libros que figura a continuación. Puedes pedirlo prestado en la biblioteca, comprarlo o pedirselo prestado a un compañero. Puedes leer una copia física o digital. Completarás la tarea después de leerlo. No es necesario que lo traigas a la escuela.

El trabajo de matemáticas de verano está pensado para ayudarte a repasar tus habilidades matemáticas durante el verano. No está pensado para que te lleve una cantidad excesiva de tiempo. Si resuelves algunos ejercicios por semana, deberías terminarlos antes del inicio de clases.

Entendemos que los estudiantes pueden necesitar apoyo para gestionar sus tareas a largo plazo. Para facilitar la planificación, hemos incluido calendarios de junio, julio y agosto al final del paquete. Además, la lista de artículos que necesitarán los alumnos de sexto grado se encuentra en la última página de este paquete.

Sabemos que el verano es un descanso escolar, pero les animamos a leer más allá de la lista adjunta. Leer no solo es una excelente manera de mejorar el vocabulario, la fluidez y la comprensión, sino que también puede generar conversaciones enriquecedoras. Familias, siéntanse libres de leer con sus hijos cualquiera de los textos obligatorios. Conversar sobre un libro mientras lo leen juntos puede enriquecer la comprensión de su hijo y ser una experiencia agradable y compartida.

Estamos trabajando y planeando un sexto grado increíble, ¡y estamos deseando empezar el año juntos! Esperamos conocerlos al regresar a clases. Que tengan un descanso seguro, relajante y bien merecido.

Atentamente,

El equipo de sexto grado: Ms. Heather, Ms. Lisa, Ms. Rachael y Ms. Sara

P.D. Si tiene alguna pregunta sobre sus tareas laborales de verano, envíe un correo electrónico a la Sra. Heather a heather.smith@newschoolsf.org.

Summer Reading & Writing for Incoming Sixth Graders

The following texts are related to themes we will discuss in sixth grade, and your familiarity with these works will enhance our discussions. You are expected to read:

- One required-for-all book: *The First Rule of Punk* by Celia C. Pérez provided to you. You must read and post-it in the paper copy that has been provided for you.
- One required choice book: choose a book from the **Required Choice Book List – Considering Perspectives** on pages 8, 9, & 10. You must choose a book that you haven't read before. The choice book may be read on an electronic device, borrowed from the library, purchased, or borrowed from a classmate.

You are expected to complete the following assignments related to the required reading:

Assignment #1 – *The First Rule of Punk* Reading Response (answers to the questions) pg 5-6

Assignment #2 – Book Review (Completed on a book from the **Required Choice Book List – Considering Perspectives**) — pg 7

When you return to school, you will bring:

1. Your copy of *The First Rule of Punk*
2. Assignment #1 – *The First Rule of Punk* Reading Response (answers to the questions)
3. Assignment #2 – Book Review (Completed on a book from the **Required Choice Book List – Considering Perspectives**)
4. Library Card Information Sheet

Name: _____

Assignment #1 - The First Rule of Punk Reading Questions / Asignación # 1 - Preguntas de la lectura de The First Rule of Punk

Answer the following questions while you read the book. Please write your answers below or type your answers on a separate document and print your answers. You do not need to type the questions, but please number your answers if you choose typing. Responde las siguientes preguntas a medida que lees el libro. Por favor, escribe tus respuestas a continuación o digitales en un documento aparte e imprímelas. No es necesario que transcriben las preguntas, pero por favor enumera tus respuestas si decides escribirlas a máquina.

1. On page 33, Malú mentions Frida Kahlo is her favorite artist. What comparisons do you see between them?

2. On page 49, a girl in Malú's class asks the question, "What are you?" Have you ever experienced someone asking another person this question? It is what's considered a microaggression. What do you know about microaggressions? What can kids do when they or their friends experience them? How does Malú react?

3. What qualities draw the band members together? How do they negotiate differences of opinion and conflict?

4. On page 112, Malú and her mother talk about the difference between being “real Mexican” and “half-Mexican.” Why does Malú feel she’s not as Mexican as her “super-Mexican” mother? Why do you suppose her mother wants her to learn so much about what it means to be Mexican? How does this make Malú, who is biracial, feel?

5. On page 296, Malú defines what it means to be punk. Based on the story, what does it mean to you to be punk? Why could this be considered a good thing?

Assignment #2 – Choice Book & Book Review

1. Choose one of the books from the Required Choice Book List – Considering Perspectives to read and write about.
2. Read the book.
3. *Then please choose OPTION A or OPTION B and follow the directions.* Your book review can be typed or handwritten.

Asignación del libro de elección # 2 - Reseña de libro

1. Elija uno de los libros de la Lista de libros de elección obligatoria: Consideración de perspectivas para leer y escribir.
2. Lee el libro.
3. *A continuación, debes seleccionar la opción A o B y sigue las instrucciones.* La reseña de su libro puede estar mecanografiada o escrita a mano

OPTION A (straightforward writing assignment):

The following must be included in your Book Review:

- **Write a title.** The title could include the name of the book.
- **Write an introductory paragraph.** You may want to start with an engaging lead to get your reader interested. Be sure to include the title, author, and genre.
- **Write a paragraph summarizing the book.** Be sure to give the names of the main people/subject and tell a little about them. This paragraph explains what the book is about.
- **Write a paragraph that gives the reader your opinion of the book.** Here you might want to write about your favorite part or what you learned. Be sure to explain why you liked or didn't like the book or why that part is your favorite.
- **Write a conclusion that lets the reader know if you recommend this book.** Tell the reader why they should or should not read this book.
- **Once you have finished your book review, be sure to review your writing.**

OPTION B (creative way to review the book):

The following must be included in your Book Review:

- Title, Author
- Draw an illustration of a key moment or event in the story. Write a short caption to describe your drawing.
- Give a rating of 1-5 stars (5 being the best book ever).
- Find and include an important sentence or passage.
- Write a paragraph summarizing the book.
- Evaluate the book. Write a few sentences about what you perceive to be the book's strengths as well as its shortcomings.
- Recommend the book. List at least two groups of people who would enjoy this book. (Ex. *For people who like Harry Potter!* or *For people interested in engineering*)
- Once you have finished your book review, be sure to review your writing.

See example —>

The Title (typed or hand-lettered)

Author's Name (typed or hand lettered)

Here, you get to put a hand-drawn illustration of a key moment or event in the story.

Here's a significant, attention-grabbing quote, in a larger font size than the text below.

SUMMARY:

Here, you will put a somewhat detailed but still SPOILER-FREE summary of the plot. Use rich language. Paint the story in the most interesting light possible.

EVALUATION:

Here, you will write a few thoughtful sentences about what you perceive to be the book's strengths as well as its shortcomings.

I RECOMMEND THIS BOOK FOR:

- people who
- people who
- people who

Required Choice Book List – Considering Perspectives (and assignment #2, book review)

***Whale Eyes: A Memoir About Seeing and Being Seen* - James Robinson and Brian Rea**

Told through an experimental mix of intimate anecdotes and interactive visuals, this book immerses readers in James's experiences growing up with strabismus, allowing them to see the world through one eye at a time.

Readers will get lost as they chase words. They'll stare into this book while taking a vision test. They'll hold it upside down as they practice "pretend-reading"...and they'll follow an unlikely trail toward discovering the power of words.

With poignant illustrations by Eisner Award-nominated artist Brian Rea, James's story equips readers of all ages with the tools to confront their discomfort with disability and turn confused, blank stares into powerful connections. (Lexile: 880L)

***Tight* - Torrey Maldonado**

Lately, Bryan's been feeling it in all kinds of ways. Bryan knows what's tight for him--reading comics, drawing superheroes, and hanging out with no drama. But drama is every day where he's from, and that gets him tight, wound up. And now Bryan's friend Mike pressures him with ideas of fun that are crazy risky. At first, it's a rush following Mike, hopping turnstiles, subway surfing, and getting into all kinds of trouble. But Bryan never really feels right acting so wrong, and drama really isn't him. So which way will he go, especially when his dad tells him it's better to be hard and feared than liked? But if there's one thing Bryan's gotten from his comic heroes, it's that he has power--to stand up for what he feels. (Lexile: 600L)

***Towers Falling* - Jewel Parker Rhodes**

When her fifth-grade teacher hints that a series of lessons about home and community will culminate with one big answer about two tall towers once visible outside their classroom window, Deja can't help but feel confused. She sets off on a journey of discovery, with new friends Ben and Sabeen by her side. But just as she gets closer to answering big questions about who she is, what America means, and how communities can grow (and heal), she uncovers new questions, too. Like, why does Pop get so angry when she brings up anything about the towers? (Lexile: 410L)

***The Epic Fail of Arturo Zamora* - Pablo Cartaya**

Save the restaurant. Save the town. Get the girl. Make Abuela proud. Can thirteen-year-old Arturo Zamora do it all or is he in for a BIG, EPIC FAIL? For Arturo, summertime in Miami means playing basketball until dark, sipping mango smoothies, and keeping cool under banyan trees. And maybe a few shifts as junior lunchtime dishwasher at Abuela's restaurant. Maybe. But this summer also includes Carmen, a cute poetry enthusiast who moves into Arturo's apartment complex and turns his stomach into a deep fryer. He almost doesn't notice the smarmy land developer who rolls into town and threatens to change it. Arturo refuses to let his family and community go down without a fight, and as he schemes with Carmen, Arturo discovers the power of poetry and protest through untold family stories and the work of Jose Marti. (Lexile: 750L)

Required Choice Book List – Considering Perspectives (cont.)

A Wrinkle in Time – Madeleine L'Engle

It was a dark and stormy night. Out of this wild night, a strange visitor comes to the Murray house and beckons Meg, her brother Charles Wallace, and their friend Calvin O'Keefe on a most dangerous and extraordinary adventure – one that will threaten their lives and our universe! (Lexile: 740L)

Elijah of Buxton – Christopher Paul Curtis

Eleven-year-old Elijah is the first child born into freedom in Buxton, Canada West (now Ontario), a settlement of runaway slaves just over the border from Detroit. He's best known in his hometown as the boy who made a memorable impression on Frederick Douglass by throwing up on him. But things change when a former slave also known as the Preacher steals money from Mr. Leroy, Elijah's friend, who has been saving to buy his family out of captivity in the South. Elijah embarks on a dangerous journey to America in pursuit of the thief, and he discovers firsthand the unimaginable horrors of the life his parents fled—a life from which he'll always be free, if he can find the courage to get back home. (Lexile: 980L)

Merci Suárez Changes Gears - Meg Medina

Merci Suarez knew that sixth grade would be different, but she had no idea just how different. For starters, Merci has never been like the other kids at her private school in Florida, because she and her older brother, Roli, are scholarship students. They don't have a big house or a fancy boat, and they have to do extra community service to make up for their free tuition. So when bossy Edna Santos sets her sights on the new boy who happens to be Merci's school-assigned Sunshine Buddy, Merci becomes the target of Edna's jealousy. Things aren't going well at home, either: Merci's grandfather and most trusted ally, Lolo, has been acting strangely lately – forgetting important things, falling from his bike, and getting angry over nothing. No one in her family will tell Merci what's going on, so she's left to her own worries, while also feeling all on her own at school. In a coming-of-age tale full of humor and wisdom, award-winning author Meg Medina gets to the heart of the confusion and constant change that defines middle school – and the steadfast connection that defines family. (Lexile: 700L)

New Kid - Jerry Craft

In this graphic novel, seventh grader Jordan Banks loves nothing more than drawing cartoons about his life. But instead of sending him to the art school of his dreams, his parents enroll him in a prestigious private school known for its academics, where Jordan is one of the few kids of color in his entire grade. As he makes the daily trip from his Washington Heights apartment to the upscale Riverdale Academy Day School, Jordan soon finds himself torn between two worlds—and not really fitting into either one. Can Jordan learn to navigate his new school culture while keeping his neighborhood friends and staying true to himself? (Lexile: GN320L)

Insignificant Events in the Life of a Cactus - Dusti Bowling

Aven Green loves to tell people that she lost her arms in an alligator wrestling match, or a wildfire in Tanzania, but the truth is she was born without them. And when her parents take a job running Stagecoach Pass, a rundown western theme park in Arizona, Aven moves with them across the country knowing that she'll have to answer the question over and over again. Her new life takes an unexpected turn when she bonds with Connor, a classmate who also feels isolated because of his own disability, and they discover a room at Stagecoach Pass that holds bigger secrets than Aven ever could have imagined. It's hard to solve a mystery, help a friend, and face your worst fears. But Aven's about to discover she can do it all . . . even without arms. (Lexile: 700L)

Required Choice Book List – Considering Perspectives (cont.)

***The Total of Eclipse of Nestor Lopez* - Adrianna Cuevas**

All Nestor Lopez wants is to live in one place for more than a few months and have dinner with his dad. When he and his mother move to a new town to live with his grandmother after his dad's latest deployment, Nestor plans to lay low. He *definitely* doesn't want anyone to find out his deepest secret: that he can talk to animals. But when the animals in his new town start disappearing, Nestor's grandmother becomes the prime suspect after she is spotted in the woods where they were last seen. As Nestor investigates the source of the disappearances, he learns that they are being seized by a tula vieja—a witch who can absorb an animal's powers by biting it during a solar eclipse. And the next eclipse is just around the corner...Now it's up to Nestor's extraordinary ability and his new friends to catch the tula vieja—and save a place he might just call home. (Lexile: 740L)

***Running Out of Time* - Margaret Peterson Haddix**

Jessie lives with her family in the frontier village of Clifton, Indiana. When diphtheria strikes the village and the children of Clifton start dying, Jessie's mother sends her on a dangerous mission to bring back help. But beyond the walls of Clifton, Jessie discovers a world even more alien and threatening than she could have imagined, and soon she finds her own life in jeopardy. Can she get help before the children of Clifton, and Jessie herself, run out of time? (Lexile: 730L)

***One for the Murphys* - Lynda Mullaly Hunt**

Carley uses humor and street smarts to keep her emotional walls high and thick. But the day she becomes a foster child, and moves in with the Murphys, she's blindsided. This loving, bustling family shows Carley the stable family life she never thought existed, and she feels like an alien in their cookie-cutter-perfect household. Despite her resistance, the Murphys eventually show her what it feels like to belong--until her mother wants her back and Carley has to decide where and how to live. She's not really a Murphy, but the gifts they've given her have opened up a new future. (Lexile: 520L)

***Olive's Ocean* - Kevin Henkes**

Sometimes life can change in an instant. - Martha Boyle and Olive Barstow could have been friends, but they weren't. Weeks after a tragic accident, all that is left are eerie connections between the two girls, former classmates who both kept the same secret without knowing it. Now, even while on vacation at the ocean, Martha can't stop thinking about Olive. Things only get more complicated when Martha begins to like Jimmy Manning, a neighbor boy she used to despise. What is going on? Can life for Martha be the same ever again? (Lexile: 680L)

***See You in the Cosmos* - Jack Cheng**

Eleven-year-old Alex Petroski loves space and rockets, his mom, his brother, and his dog, Carl Sagan - named for his hero, the real-life astronomer. All he wants is to launch his golden iPod into space the way Carl Sagan (the man, not the dog) launched his Golden Record on the Voyager spacecraft in 1977. From Colorado to New Mexico, Las Vegas to LA, Alex records a journey on his iPod to show other lifeforms what life on Earth, his Earth, is like. But his destination keeps changing. And the funny, lost, remarkable people he meets along the way can only partially prepare him for the secrets he'll uncover - from the truth about his long-dead dad to the fact that, for a kid with a troubled mom and a mostly not-around brother, he has way more family than he ever knew. (Lexile: 1120L)

6th Grade Math Packet Summer 2026

6th Grade Math Packet

Summer 2026

Directions

Take the first two weeks of summer completely off. Start working on this packet during the week of June 29th. The packet is broken down by weeks of work. Your best practice is to complete one week at a time, so you have small, regular math practice over the course of the summer.

DOING A LITTLE WORK MULTIPLE TIMES OVER THE SUMMER IS MUCH BETTER THAN DOING A BUNCH OF WORK ALL AT ONCE!

You will turn in this packet when school starts. Do your best on each problem. It's ok if you don't solve all of them correctly, but you should put some work into every problem and show what you tried.

The purpose of the summer work is to practice your skills and give your brain a workout, so do all work on your own without a calculator. If you come across a word you don't recognize, check the glossary at the end of the packet.

The packet includes some non-optional challenge problems. Do your best on these and show your thinking. (It is ok if you don't totally figure it out or get an incorrect solution, as long as you've tried your best and shown your thinking.)

Paquete de matemáticas de sexto grado

Verano 2026

Direcciones

Tómate las dos primeras semanas del verano por completo. Empiece a trabajar en este paquete la semana del 29 de junio. El paquete se desglosa por semanas de trabajo. Su mejor práctica es completar una semana a la vez, por lo que tiene una pequeña práctica de matemáticas regular durante el verano. Esto le beneficiará más que intentar hacerlo todo a la vez.

¡HACER UN POCO DE TRABAJO VARIAS VECES DURANTE EL VERANO ES MUCHO MEJOR QUE HACER MUCHO TRABAJO TODO A LA VEZ!

Entregará este paquete cuando comience la escuela. Haz tu mejor esfuerzo en cada problema. Está bien si no los resuelve todos, pero debe esforzarse un poco en cada problema y mostrar lo que intentó.

El propósito del trabajo de verano es practicar tus habilidades y ejercitar tu cerebro, así que haz todo el trabajo por tu cuenta sin una calculadora. Si encuentra una palabra que no reconoce, consulte el glosario al final del paquete.

El paquete incluye varios problemas de desafío (no opcionales). Haz lo mejor que puedas en estos y muestra tu pensamiento. (Está bien si no lo averiguas por completo o obtienes una solución incorrecta, siempre y cuando hayas hecho tu mejor esfuerzo y mostrado tu pensamiento.)

Week 1

1) Basic Operations

Complete each of the problems below. **Show your work.**

$$425 + 309 =$$

$$813 - 472 =$$

$$64 \cdot 97 =$$

$$8652 \div 12 =$$

2) Fraction number line

Place the following fractions on the number line below. $\frac{4}{5}$, $\frac{10}{20}$, $\frac{3}{2}$, $\frac{1}{8}$, $\frac{8}{4}$

3) Multiples

List the first 10 multiples (starting with the number itself) for the numbers below.

7:

11:

4) Area & perimeter

Find the perimeter and area of the figures. (Figures not drawn to scale.)

P =

A =

P =

A =

5) Adding and subtracting with an algorithm

Your turn to play teacher. Find the mistake in each of the problems below. Highlight or circle the mistake. Then, solve the problem correctly.

$$63.409 + 3.87 = 63.796$$

$$\begin{array}{r} 63.409 \\ + 3.87 \\ \hline 63.796 \end{array}$$

$$6.52 - 3.008 = 3.528$$

$$\begin{array}{r} 6.52 \\ - 3.008 \\ \hline 3.528 \end{array}$$

Week 2

1) Area & perimeter challenge

Jenny has 40 feet of wooden fencing to use for the perimeter of her garden. Using all 40 feet of fencing and only whole numbers, what measurements (length and width) would give her the LARGEST AREA and the SMALLEST AREA for her garden?

2) Basic Operations

Complete each of the problems below. **Show your work.**

$$1708 + 821 =$$

$$905 - 238 =$$

$$53 \cdot 28 =$$

$$1836 \div 9 =$$

3) Equivalencies

Fill in the following table so each row has a fraction, decimal, and equivalent fraction of the same value.

Fraction	Decimal	Equivalent Fraction
$\frac{\quad}{100}$	0.5	$\frac{\quad}{10}$
$\frac{1}{4}$		$\frac{\quad}{20}$
$\frac{85}{10}$		
	0.02	

4) Solving equations

Your turn to play teacher. Find the mistake. Highlight or circle the mistake you identified. Then, solve the problem correctly.

$$(120 - 14) \div 2 + 8 = 10 R 6$$

$$106 \div 2 + 8$$

$$106 \div 10$$

$$10 R 6$$

5) Factors

List all factors of the numbers below.

$100 =$

$64 =$

$250 =$

6) Quantitative Comparisons

For each question below, determine which column has the greater value, A or B. **Circle** the value that is greater. If the values in the two columns are equal, draw an equals sign between them. If you do not have enough information to determine which column is greater, write “not enough information.” **Be sure to show your work/explain your thinking.**

Column A

$$\frac{1}{9} + \frac{3}{8} + \frac{5}{6}$$

$$5 \times 100 - 5 \times 2$$

Column B

$$\frac{4}{6} + \frac{3}{8} + \frac{1}{9}$$

$$5 \times 98$$

Week 3

1) Order of operations

Solve each expression by finding the number it is equivalent to.

$$6 \times (3 + 9) - 40 \div 5$$

$$3 - 0.5 \times 2 + 4(8 - 1)$$

2) Volume of rectangular prisms.

Find the volume of the following rectangular prisms.

Volume =

Volume =

3) Fractions and mixed numbers

Change the following fractions to mixed numbers and mixed numbers to fractions.

$$\frac{24}{7} =$$

$$\frac{13}{2} =$$

$$\frac{7}{5} =$$

$$\frac{18}{9} =$$

$$3\frac{1}{8} =$$

$$5\frac{4}{7} =$$

$$9\frac{1}{11} =$$

$$4\frac{5}{6} =$$

4) Factors

List all of the factors for the numbers below.

24:

30:

5) Add & subtract fractions

Your turn to play teacher. Find the mistake. Highlight or circle the mistake you identified. Then, solve the problem correctly.

$$\frac{7}{15} + \frac{2}{3} = \frac{3}{5}$$

$$\frac{2}{3 \cdot 5} = \frac{2}{15}$$

$$\frac{7}{15} + \frac{2}{15} = \frac{9}{15}$$

$$\frac{9 \div 3}{15 \div 3} = \frac{3}{5}$$

$$\frac{5}{9} - \frac{2}{7} = \frac{1}{3}$$

$$\frac{5 \cdot 7}{9 \cdot 7} = \frac{35}{63}$$

$$\frac{2 \cdot 7}{7 \cdot 9} = \frac{14}{63}$$

$$\frac{35}{63} - \frac{14}{63} = \frac{21}{63}$$

$$\frac{21 \div 21}{63 \div 21} = \frac{1}{3}$$

CHALLENGE

Patrick tosses all of his loose change into a jar, which at present contains \$14.35. Coincidentally, that \$14.35 is made up of an equal number of pennies, nickels, dimes, and quarters, and no other coins. How many of each coin does Patrick have in the jar?

Week 4

1) Comparing decimals & fractions

Compare the following pairs of fractions and decimals using $<$, $>$, or $=$.

$4.2 \bigcirc 4.02$

$13.25 \bigcirc 13.255$

$0.9 \bigcirc 1.0$

$\frac{6}{7} \bigcirc \frac{11}{20}$

$\frac{15}{21} \bigcirc \frac{10}{12}$

$\frac{1}{3} \bigcirc \frac{25}{75}$

2) Decimals in words

Name the following decimals in words.

14.32 _____

9.601 _____

3) Quantitative Comparisons

For each question below, determine which column has the greater value, A or B. Circle the value that is greater. If the values in the two columns are equal, draw an equals sign between them. If you do not have enough information to determine which column is greater, write “not enough information.” **Be sure to show your work/explain your thinking.**

Column A

Column B

The perimeter of a square with side lengths of 4 inches.

The area of a square with side lengths of 4 inches.

$$14.89 + 7.05$$

$$87.5 - 66.01$$

4) Algebraic reasoning

Determine the missing number based on the given description.

a) The product of a number and 5 then added to 1 is 11. What is the number?

b) The sum of twice a number and 3 is 7. What is the number?

5) Multiplying with an algorithm

Your turn to play teacher. Find the mistake. Highlight or circle the mistake you identified. Then, solve the problem correctly.

$$852 \cdot 46 = 39,292$$
$$\begin{array}{r} \overset{2}{\cancel{8}}\overset{1}{5}2 \\ \times 46 \\ \hline 5112 \\ + 34180 \\ \hline 39292 \end{array}$$

6) Add & subtract fractions

Choose 3 of the problems below to solve. Pick problems that are at your “just right” level - not too easy, not too hard.

a) $\frac{4}{9} + \frac{2}{9} =$

b) $\frac{54}{100} - \frac{23}{100} =$

c) $\frac{3}{4} - \frac{1}{2} =$

d) $\frac{7}{8} + \frac{5}{12} =$

e) $\frac{7}{9} - \frac{15}{27} =$

f) $\frac{3}{5} + \frac{3}{6} =$

CHALLENGE

Colored beads are placed in the following order: 1 red, 1 green; then 2 red, 2 green; then 3 red, 3 green; and so on. In all, how many of the first 100 beads are red?

Glossary

area: Area is the space occupied by a flat shape or the surface of an object. The area of a figure is the number of unit squares that cover the surface of a closed figure.

Example: The area of a rectangle is length multiplied by width (or $l \times w$). For this shape that is 1 cm x 2 cm, the area is 2 cm².

factor: Numbers that we multiply together to get another number (the product) are called factors.

Example: 2 and 3 are factors of 6, since $2 \times 3 = 6$.

lowest terms (simplify): We reduce a fraction to lowest terms (simplify the fraction) by finding an equivalent fraction in which the numerator and denominator are as small as possible. This means that there is no number except 1 that can be divided evenly into both the numerator and denominator.

Example: $\frac{4}{6}$ can be simplified to $\frac{2}{3}$ since the numerator 4 can be divided by 2 to get 2 and the denominator 6 can be divided by 2 to get 3. There is no lower whole number that divides both 2 and 3.

multiple: Numbers that we get when we multiply one whole number by another whole number are called multiples.

Example: Given $7 \times 5 = 35$ and $7 \times 6 = 42$, 35 and 42 are multiples of 7.

perimeter: The distance all the way around the edges of a 2 dimensional shape is the perimeter.

Example: For this shape there are 2 sides that are 2 cm long and 2 sides that are 1 cm wide. We can add $2 + 2 + 1 + 1$ to find the perimeter of 6 cm around the shape.

G5 to G6 Summer Work Planner

Use the calendars to plan out when you will complete your summer assignments.

June

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20

Supply List – Incoming 6th Graders

When you return for 6th grade, you will bring:

1. Your copy of ***The First Rule of Punk***
2. Assignment #1 – ***The First Rule of Punk*** Reading Response (answers to the questions)
3. Assignment #2 – Book Review (Completed on a book from the **Required Choice Book List – Considering Perspectives**)
4. Math work in this packet
5. A backpack big enough to fit a 3” binder, planner, books, pencil case, school-provided student technology, lunch, and a water bottle
6. San Francisco public library card with pin number (please bring this information at the start of the school year). If you do not have one, the directions for getting a library card are on the next page.
7. A water bottle with a screw top lid

School will provide:

- planner
- student technology
- All necessary school supplies for each student

Lista de suministros - Estudiantes que ingresan al 6to grado

Cuando regrese para el 6to grado, deberás traer:

1. Su copia de ***The First Rule of Punk***
2. Asignación #1 - Reseña del ***The First Rule of Punk*** Respuesta de lectura (respuestas a las preguntas)
3. Asignación #2: Reseña de libros (completada con un libro de **Required Choice Book List – Considering Perspectives**)
4. El trabajo de matemáticas incluido en este paquete
5. Una mochila lo suficientemente grande como para caber en una carpeta de 3”, planificador, libros, estuche de lápices, tecnología proporcionada por la escuela para los estudiantes, almuerzo y una botella de agua
6. Tarjeta de la biblioteca pública de San Francisco con número de pin (por favor traiga esta información al comienzo del año escolar). Si no tiene una, las instrucciones para obtener una tarjeta de biblioteca se encuentran en la página siguiente.
7. Una botella de agua con tapa de rosca

La escuela proporcionará:

- Planificador
- Tecnología para estudiantes
- Todos los útiles escolares necesarios para cada estudiante

Hoja informativa sobre la tarjeta de la biblioteca pública

Hola familias de sexto grado,

En la escuela secundaria, los estudiantes son más propensos a leer de forma independiente si tienen acceso a libros que les interesan. Una forma en que facilitamos el acceso a libros electrónicos es mediante la aplicación Libby en los dispositivos de los estudiantes. Para ello, cada estudiante necesita su número de tarjeta de la biblioteca pública y su PIN.

Si su estudiante no tiene una tarjeta de biblioteca pública, por favor elija una de las siguientes opciones::

- Si vives en San Francisco, visita una sucursal de la biblioteca pública de San Francisco para obtener una tarjeta y un número PIN. (Consulta este sitio web para ver las ubicaciones de las sucursales en San Francisco). <https://sfpl.org/locations>)
- Si vives fuera de San Francisco, visita la biblioteca pública más cercana para obtener una tarjeta de biblioteca y un número PIN.
- Si necesitas ayuda para obtener una tarjeta de biblioteca, avísale al orientador de tu hijo/a de sexto grado cuando comiencen las clases en agosto.

Nombre del estudiante: _____

Información sobre la tarjeta de la biblioteca

1. Saca tu carné de biblioteca de estudiante.
2. ¿De qué ciudad es esta tarjeta de biblioteca? Marque una opción:

San Francisco

Oakland

Otro: _____

3. **Escriba aquí el número de su tarjeta de biblioteca.:**

4. **Escriba aquí el número PIN.:** _____

Si no conoce el número PIN de la tarjeta de la biblioteca de San Francisco de su estudiante, puede restablecerlo en este enlace: <https://sflib1.sfpl.org/pinreset>

Public Library Card Information Sheet

Hello Grade 6 Families,

In middle school, students are more likely to read independently if they have access to books that interest them. One way that we provide access to electronic books is the Libby app on student devices. To do this, every student needs a public library card number and pin number.

If your student does not have a public library card, please choose from the following:

- If you live in San Francisco, visit a San Francisco public library branch to get a card and pin number. (See this website for branch locations in San Francisco: <https://sfpl.org/locations>)
- If you live outside of San Francisco, visit your nearest public library to get a library card and pin number.
- If you need support getting a library card, let your sixth grader's advisor know when school starts in August.

Student Name: _____

Library Card Information

1. Take out student library card
2. Which city is this library card from? Circle one:

San Francisco

Oakland

Other: _____

3. **Write library card number here:** _____

4. **Write pin number here:** _____

If you do not know your student's San Francisco library card pin number, you can reset it at this link: <https://sflib1.sfpl.org/pinreset>
