

HW 1 FALL 2026
MATH 394 GEOM ADV VIEWPOINT I

Q1.1. (Logic) Is the the following statement correct? If not, state the correct one.

The negation of “All triangles are isosceles” is “No triangles are isosceles.”

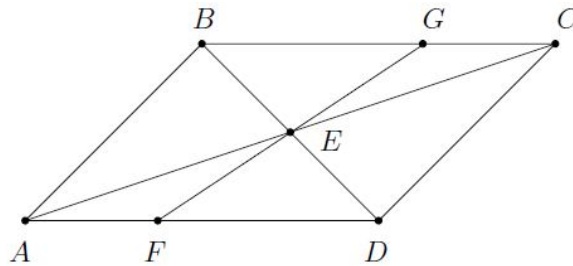

Q1.2. [Lee, p.50, 2A]

Q1.3. [Lee, p.50, 2C]

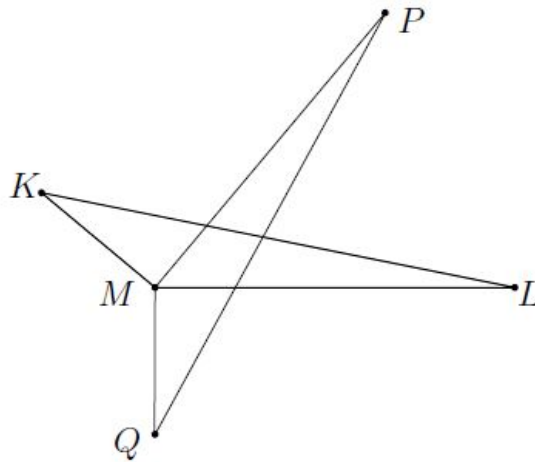

Q1.4. [Lee, p.51, 2E]

Q1.5. [Lee, p.51, 2I]

Q1.6. [Use Basic Facts] Suppose $\square ABCD$ is a parallelogram, and the lines in the picture below that look straight are straight. Prove that E is the midpoint of segment FG .

Q1.7. [Use Basic Facts] Suppose in the picture below $MK = MQ$, $\angle K = \angle Q$, $PM \perp MK$, and $LM \perp MQ$. Prove that $\angle L = \angle P$.
